Team Leader Rubrics

Criteria	Exemplary (4 pts)	Proficient (3 pts)	Developing (2 pts)	Needs Improvement (1 pt)	Score
1. Repository Architecture & Health	Maintains a clean structure, enforces branch protection rules, updates README.md, and cleans up stale branches.	Keeps repository organized and manages branch integration smoothly.	Repository structure becomes messy; stale/outdated branches remain uncleaned.	Neglects repo maintenance; leaves broken builds, merge conflicts, or missing docs.	__ / 4
2. Merge Conflict & Integration Supervision	Oversees branch integration, ensuring clean merges into main release branches without breaking builds.	Assists in resolving complex merge conflicts when they arise.	Struggles to manage branch integration, resulting in frequent merge conflicts.	Fails to supervise integration, causing broken builds on primary branches.	__ / 4
3. Team Activity & Velocity	Ensures balanced workload distribution and keeps every team member actively contributing.	Monitors team output and keeps workload reasonably balanced.	Contributions are heavily unbalanced; some members carry most of the workload.	Poor oversight; team members are inactive, disengaged, or working in isolation.	__ / 4
4. Team Coordination & Communication	Facilitates smooth communication across Developer, QA, and PM roles to align goals.	Leads regular check-ins and keeps communication open between roles.	Communication is sporadic; roles work in silos with little interaction.	Fails to coordinate the team; lack of communication causes conflicting work.	__ / 4
5. Overall Milestone Delivery	Ensures all planned weekly deliverables are fully integrated, tested, and ready for release.	Delivers the core planned requirements for the week on schedule.	Delivers incomplete features or misses minor weekly release goals.	Fails to deliver core weekly targets, resulting in a stalled project.	__ / 4

Note:

- Team Leaders are responsible in keeping the project going by managing each member to cooperate and contribute to the project.
- Team Leaders are given the authority to override a task from the Project Manager, QA and Developer. But if the Leaders chooses to be a Developer, they are not allowed to take on the task of a QA.

Team Leader Rubrics

- Team Leaders are tasked to check on the Team for their cooperation for the project. Any findings that are detrimental to the team, the Team Leaders are required to notify the Instructor to take action on this inactive member.
- Team Leaders are tasked to always communicate with the team. Do not pressure the members to participate if they refuse to contribute, this will reflect on them and not to the leader.
